

Let us know how we can take good care of your camper.

It is very important that you send in a completed Health form well before your camper's arrival at camp. No forms no camp! Resident Camp health form is due in May and Day Camp forms due 2 weeks before arrival, so camp health personnel can review the form properly.

We have a full-time summer nurse who is at camp 24 hours a day during the summer. Our local hospital and urgent care centers are located within a 30 minute drive of our facility. Remember all medications (prescription or over-the-counter, including vitamins) must be turned in to staff at Check-in. They must be in the original containers.

Food allergies

Please be sure to disclose any food allergies or dietary restrictions on your child's health form. We will do our best to provide alternatives. We also ask that you contact the office, at least 30 days in advance of your child's stay so you can discuss the best course of action.

Disabilities and special health needs

If your child has a disability or special needs, please call us at least 90 days in advance of the camp date for an evaluation of the camper's care needs. Camp Jorn counselors are encouraging and patient and can help facilitate successful camp experiences for children with mild and moderate disabilities. Our programs are not designed for campers who need significant assistance or personal care, require constant one-on-one support, or have difficulty managing their behavior in group settings.

Health conditions requiring advance clearance include, but are not limited to: Cardiac Situations, Asthmatics, Seizure Disorders, Autism Spectrum, and Serious Food Allergies.
